What is Calcium2go?

Calcium2go is the first and only brand of calcium and vitamin D3 powder that is soluble by mouth. No water is necessary to consume the product. Calcium2go powder contains 400 mg of elemental calcium as fine granulated coral granules with vitamin D3 in a refreshing berry flavor. The coral calcium used in this formulation was extracted from the oceans of Okinawa, Japan and processed in the United States.

Calcium2go INDICATIONS

- Better Management of Osteopenia and Osteoporosis
- Stronger Bones to Prevent Fractures
- Dietary Calcium Supplement
- Recommended for women of all ages including pregnant and lactating women

WHAT IS OSTEOPENIA?

Osteopenia is a condition where bone mineral density is lower than normal. It is considered by many doctors to be a precursor to osteoporosis.

WHAT IS OSTEOPOROSIS?

Osteoporosis is a disease of bones that leads to an increased risk of fracture. In osteoporosis the bone mineral density (BMD) is reduced, bone microarchitecture is disrupted, and the amount and variety of proteins in bone is altered.
